

SG ENGINEERS

We are here to provide construction works

ABOUT US

*We focuses exclusively
on excellence*

S G Engineers hold the credibility of being one of the most trusted names in the field in design and construction. With over the decade of expertise in the industry, we have completed prestigious projects all over India and made our clients happy.

S G Engineers, is under the partnership firm of Mr. Gaman Singh who holds a degree in civil engineering and Mrs. Renu Yadav, and Mr. Sunil Kumar who holds a Masters Degree in business administration.

We pride ourselves in having a diligent technical and executive staff, who came with an eclectic experience from handling varied projects. From farm houses to residential bungalows, office projects, hotels to commercial complexes, multi-storied construction to group housing.

VISION

To become a one stop shop for making houses and other dream project, from being a construction company to one that designs, conceptualizes and develops.

MISSION

To set new benchmarks in the construction and design industry and be a name to reckon by providing impeccable quality of service and novel design ideas

WE ARE THE LEADERS IN THE CONSTRUCTION INDUSTRY

At S G Engineers, we are aiming to provide high quality construction, design, consultancy, support and results since 1998.

SAFETY MEASURES

ON-SITE MEASURES

Appropriate safety measures are counted as performance indicators for companies in this day and age. Studies have shown a clear link between a company's performance and its healthy safety measures. The safer the employees and the client feel in an environment, the more productive the project is.

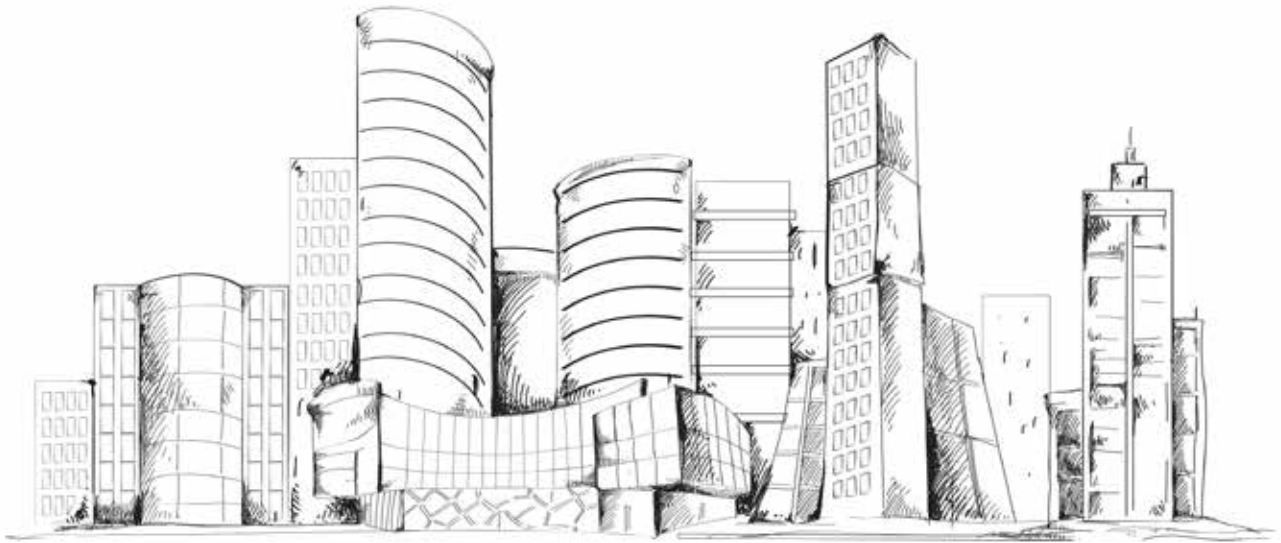

S.G Engineers adopt several safety measures that meet impeccable standards of quality. On the job, we provide hard helmets to all our workers, construction workers and management alike. Our safety engineers inspect the site in all aspects before work commences. Despite the safety measures if there is an unforeseen mishap, we have a readily available well equipped first aid box. We also make it a point to provide all our employees with medical insurance facility so that they are always in good hands. In addition to this, we also collaborate with hospitals close to the site area so that medical help is promptly available, in case of emergency.

TRAINING

Providing a safe haven for our employees and medical aids, is not sufficient if they not trained for it. Upon joining, all our employees undergo a vigorous training program. Before any employee is assigned the responsibility of a machine or a tool, he/she undergoes training to use it. All machine operators are provided manuals which instruct them to use a particular machine or how to maintain the same. Employees are also given on the job training, wherein, they are taught how to use the protective gear and the correct manner of wearing them. Additionally, we also give our employees and even contractual workers training on how to use a first aid box.

MACHINERY SAFEGUARDS

Safety guards are installed in all our machines to avoid employees getting hurt accidentally. We pride ourselves in owning the latest machinery with the latest technology. We do not rest on our laurels and keep upgrading our machinery, while also taking measures to maintain them regularly.

We Strive for Excellence Focuses Only On Clients
